

JEREMY C. FONTENOT

IT Service Desk | Windows Systems Administration | Microsoft 365 & Entra

Abbeville, Louisiana | jeremyfontenot.online | [linkedin.com/in/jeremy-fontenot](https://www.linkedin.com/in/jeremy-fontenot) | github.com/fontenotjeremy71-hub

PROFESSIONAL SUMMARY

IT support professional with enterprise Service Desk experience and hands-on Windows infrastructure administration. Professional experience includes serving as the sole internal IT resource for a startup, where I built its initial on-premises Windows environment, deployed Active Directory Domain Services, configured Cloudflare DNS, and established Microsoft 365 services. Current focus is advancing into Windows Systems Administration through production support, PowerShell, Microsoft 365/Entra, Intune, virtualization, and an evidence-backed home lab.

CORE SKILLS

Microsoft: Active Directory Domain Services (AD DS), Group Policy, Windows Server, Microsoft 365, Microsoft Entra ID, Intune, Windows Autopilot, Azure Arc

Administration: User/group administration, authentication, permissions, workstation integration, DNS, DHCP, account lifecycle, endpoint support

Support & ITSM: Service Desk, incident triage, troubleshooting, escalation, knowledge documentation, Ivanti, ServiceNow

Infrastructure: Hyper-V, SCVMM, Windows Admin Center, Proxmox, pfSense, OpenVPN, Linux

Automation: PowerShell, Microsoft Graph, REST API reporting and administration

PROFESSIONAL EXPERIENCE

Service Desk Technician — Logicalis

Apr 2024 - Present

MSP support for enterprise healthcare and industrial clients

- Provide enterprise Service Desk support for Summa Health and additional MSP clients, including Windows, application, account, and connectivity troubleshooting.
- Perform Active Directory account administration, password resets, new-user setup, permissions support, and identity-related troubleshooting within Service Desk scope.
- Support healthcare applications and workflows including Epic, MyChart, Vocera, and Ivanti ticketing; document resolutions and escalate complex issues to Tier 2/3 teams.
- Self-reported performance includes an average resolution time of 0.83 days, 85% of incidents resolved without reassignment, and 72% same-day resolution.

Service Desk Representative / Team Lead — Insight Global

Oct 2022 - Jan 2024

Healthsystems service desk support

- Provided end-user technical troubleshooting, ticket ownership, escalation support, and customer communication in a production support environment.
- Supported team coordination and technician guidance while maintaining incident ownership and service-quality expectations.

IT Technician — Completeful Technologies

Feb 2022 - Jun 2022

Sole IT administration and startup infrastructure deployment

- Joined during the launch of a new drop-shipping company and served as the primary internal IT resource responsible for establishing its initial IT environment.
- Built and configured the on-premises Windows infrastructure, including Windows Server and Active Directory Domain Services for centralized identity, authentication, users, groups, policy, and workstation integration.
- Configured Cloudflare for authoritative DNS and domain services, and established the company's Microsoft 365 environment for cloud productivity and identity-related business services.
- Handled day-to-day IT administration and user support after rollout, covering endpoints, accounts, applications, access, and general technology needs across the organization.

Technical Support — Hughes Network Systems

Sep 2021 - Feb 2022

Customer-facing connectivity and technical support

- Troubleshoot network connectivity, equipment, and service issues while guiding customers through technical resolution steps.

Help Desk — Remington College

Dec 2019 - Apr 2021

Academic IT support

- Provided user and endpoint support while completing an A.S. in Computer Science - Database Administration.

SELECTED SYSTEMS ADMINISTRATION PROJECTS

- Windows LAPS & Advanced Group Policy: schema extension, encrypted password backup, OU delegation, RSOP validation, negative access testing, and forced password rotation.
- Microsoft Entra Hybrid Identity & Cloud Sync: scoped AD-to-Entra provisioning, Password Hash Sync, source authority, agent health, and provisioning troubleshooting.
- Windows Autopilot & Intune MDM: user-driven Entra join, Enrollment Status Page, Microsoft 365 Apps, BitLocker, Defender, Secure Boot remediation, and compliance validation.
- Microsoft 365 Graph Administration Lab: reusable PowerShell/Graph reporting for tenant inventory, users, groups, licensing, directory roles, stale accounts, and Intune devices.

EDUCATION

A.S. Computer Science - Database Administration, Remington College | Aug 2019 - May 2021 | GPA 3.84, Honors / Dean's List

Information Security & Administration, MyComputerCareer | Jun 2021 - Jan 2022 | GPA 4.00, WCITP
